

Micro VMF

Big Savings in a Small Package

Falkonair's Micro VMF (Variable Mass Flow) solution is built for spaces where efficiency and cost effectiveness are essential. From rooftops to compact commercial facilities, the Micro VMF delivers the same patented, energy-saving performance as our full-scale VMF systems—packaged in a smaller footprint.

Key Benefits

-  Cuts compressor energy use by 25–45%
-  Extends equipment lifespan with reduced mechanical stress and noise
-  Compact design – ideal for fast food, retail, healthcare, and small commercial spaces
-  Seamless retrofit into existing HVAC-R infrastructure
-  Cost-effective solution for outdoor use
-  Does not interfere with existing controls
-  Available in 5-20HP 230V and 5-30HP 460V

The Micro VMF proves that big savings don't require a big expense.

Engineered with Falkonair's commitment to innovation, it helps facilities reduce energy waste, lower operating costs, and extend HVAC-R equipment life.

Smarter. Proven. Protected.
